

DC/quattro

Sanitiser based on quaternary ammonium salts

APPLICATIONS

Thanks to the surfactant and bactericide activity of the quaternary ammonium salts, **DC/quattro** has a detergent, sanitising and deodorising capacity.

It is really effective on disruption of *Escherichia coli*, *Stafilococcus piogenes* and *aureus*, *Saccharomyces cerevisiae*.

DC/quattro is recommended for cleaning and sanitising rooms, walls, floors, even with water infiltration or affected by mould.

It can be successfully applied also on cleaning and sanitising winery plants, rinsing well at the end of the application.

DOSES AND INSTRUCTIONS FOR USE

Dilute in water at 0,1-0,5 % for sanitising; 0,5-1 % for anti-spore activity.

It can be used by cleaning directly, irrigating, filling, brushing, sponging down, etc. Keep in contact at least for 5-10 minutes for a good sanitising activity.

To take advantage of the maximum sanitising and deodorising activity rinse after some hours or days from the application.

If not removed by rinsing the product activity on the surface keeps unlimitedly.

Do not use on rubber, copper, bronze and zinc-plated materials.

For treating walls infected by mould, dilute **DC/quattro** in water at 1% and brush. Then if necessary paint.

DC/quattro can be used also directly in the paint at 0.5-1%.

PACKAGING

1 litre bottle,
20 litres container.
