

SKIUNÒ SAN™

Detergent/Sanitiser based on vegetal surfactants with deodorising action

APPLICATIONS

Skiunò San has a detergent, sanitising and deodorising capacity. It is based on vegetal raw materials and in specific vegetal surfactants.

Skiunò San is an innovative product because it helps to reduce the number and dosage of the traditional chemical detergents.

Skiunò San is recommended for removing organic residues from the all equipment used during the harvest (trailers, bins, hoppers, conveyors, crushers, pipes, pumps, etc). Anyway it can be used generally for cleaning all the surface going in contact with grapes and juice.

DOSES AND INSTRUCTIONS FOR USE

Dilute at 3% in water, better at 18-20°C.

It can be used by cleaning directly, irrigating, filling, brushing, sponging down, etc.

Keep in contact at least for 5-10 minutes and remove the product with water.

Skiunò San can be applied on every type of surface since is not a corrosive product.

SAFETY INFORMATION

The product is classified as not hazardous.
