

## INFINITY Creamy

*American oak tannin*

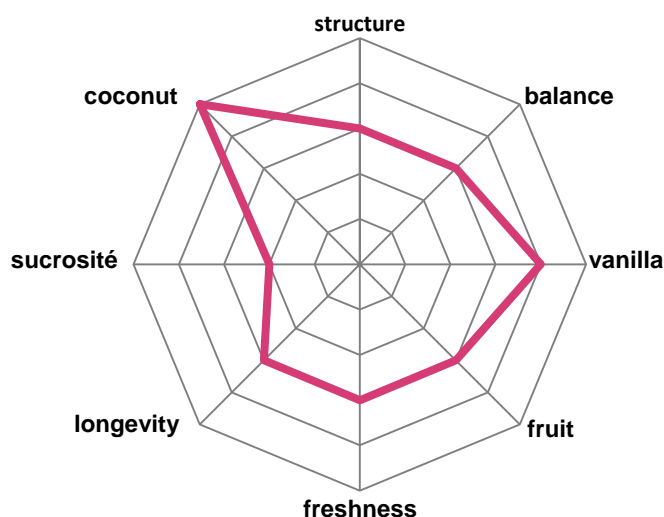

### APPLICATIONS

Infinity Creamy gives wines a notable sensory impact. On the nose, increases complexity with notes that remind of confectionery as well as coconut and vanilla that are typical of toasted wood. The impact found on the nose is confirmed in the mouth with an improved structure.

It can be used on white and red wines during the *élevage* and for finishing touches. During the *élevage* it can be used in third or more fill barrels in order to contribute to the aromatic intensity and complexity.

Infinity Creamy also has a good sensory impact on the nose (flavour) cleanliness by removing off-flavour as reductive notes and by re-establishing the redox balance. On the nose shows wider and cleaner aromas, in red wines it reveals black/red fruits notes.

At high dosages, especially in white wines, it redesigns the sensory profile and increases the final value of the wine. Infinity Creamy has an extraordinary effect and therefore can be used even at low dosages or for blends.
