DAL CIN COMPLIES WITH THE ITALIAN RESPONSIBLE PAYMENT CODE

On 12 December the Payment Code Committee, managing body of the Italian Responsible Payment Code, announced to Dal Cin Gildo Spa its inclusion in the list of virtuous companies regarding fair and transparent payments, after the positive reports based on the financial statements and the testimonies of professional referees, in the field of *"chemicals, additives and aids for the beverage industry, products for agriculture and industry."*

The Italian Responsible Payment Code (www.pagamentiresponsabili.it/wp-content/uploads/2014/06/Il-Codice-eng.pdf) is an initiative of Assolombarda (Confindustria) in collaboration with the Bocconi University in Milan, launched in March 2014 and inspired by the British Prompt Payment Code, strongly sponsored by the UK government and by the CBI (Confederation of British Industry), which aims to collect and highlight in a special Register all those companies that stand out for the correct application of payment terms with suppliers, in the light of objective and verifiable data (see the updated list: www.pagamentiresponsabili.it/aziende-aderenti/).

The stay in the list of such companies is constantly being confirmed on the basis of annual audits of the financial statements and qualified testimonials ("*referees*"), as well as any reports received from third parties, which are also included in the list, confirming or refuting the characteristics of reliability.

This is a further recognition to Dal Cin's ultra decennial entrepreneurial seriousness, not only in terms of quality and reliability of its production, but also in respect of the many national and international suppliers that may work with Dal Cin with the best serenity and confidence.
